Subject: Mill Creek Chemical Release 29MAR23
Attachments: ICS209-Mill Creek Chemical Release 29MAR .docx; smime.p7s

Good afternoon,

Attached is our March 29th, 2023, Situation Report for everyone's Awareness. As discussed at today's meeting the following outlines the objectives, and deliverables moving forward:

Operational Period: March 30, 2023- April 3, 2023

Next Unified Command Meeting: April 3, 2023 at 10:00 a.m. at DOW Chemical

Objectives:

- Decontaminate outfall until no further water discoloration is observed in Mill Creek.
- Recover any discolored water from Mill Creek.
- Decontaminate and recover water from Trinseo's storm water drainage system until no further water discoloration is observed:
 - Water entering the storm water basin
 - The storm water basin
 - Drainage line to Sewer outfall #8 from storm water basin

Daily Sitrep emailed to the Unified Command and stakeholders (all addresses on this email) by 2:00 p.m. from Trinseo/DOW Chemical. Sitrep shall include the following information:

- Summary of work since last report
- Future Outlook/Goals/Needs/Issues
- Amount of contaminated water recovered total/since last report
- Equipment/Personnel on-scene working on clean-up efforts (Trinseo/DOW/other contractors)
- Any wildlife or environmental impacts

Very Respectfully,
LCDR Kevin Higgins
Sector Delaware Bay
Incident Management Division Chief
